# Access control for your premises

Access control is a major issue with regards to the protection of buildings and facilities from intruders. For over 30 years Kaba has been providing a complete range of innovative physical access and security doors systems comprising Turnstiles, Sensor Barriers, Revolving Doors and Security Interlocks with anti back-track resource to ensure a definitive access control solution for your business.

These solutions can be equipped with sensors to monitor and analyse the interior of the unit and can be activated by card readers, buttons, operating panels or by biometric identification systems to enhance security and provide excellent thermal insulation.

Kaba Public Access Solutions are successfully in operation within government and MoD buildings, hospitals, airports, banks, power plants, stadiums and many other businesses world-wide.

To find out how Kaba Public Access Solutions can improve your access control, enhance your security and save you money by reducing your energy costs please contact us.

# Public Access Solutions - Product Selector

## Orthos

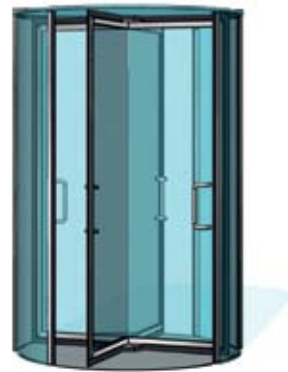

<b>Throughput rate</b>	= approx. 6 per minute
<b>for PIL-M02</b>	= 40 to 60
<b>Security level</b>	= ★ ★ ★ ★ ★
<b>Staff supervision</b>	= no

### Orthos Security Interlocks/Personal Interlocks

Orthos electronically monitored interlock systems meet the highest security requirements and provide optimum protection for sensitive areas of a building. These may include authorising staff access using a card reader, pin code keypad, weight scales or biometrics. The Orthos product family also includes modular one-way corridors.

## Geryon

<b>Throughput rate</b>	= approx. 16 to 22 per minute
<b>Security level SRD</b>	= ★ ★ ★ ★
<b>Security level SRD</b>	= ★ ★ ★
<b>Staff supervision</b>	= no

### Geryon Security Revolving Doors

A choice of glass or metal body, extended passage heights, glass roofs and various security control devices including biometric verification makes Geryon a popular and versatile range. Geryon revolving doors are also an energy efficient way of reducing cold ingress into a building, thus significantly reducing utility rates.

## Kentaur

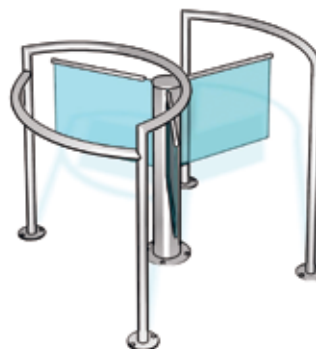

<b>Throughput rate</b>	= up to 40 per minute
<b>FTS-M01/M02</b>	= 7 per minute with bike
<b>Security level</b>	= ★ ★ ★ ★ ★ ★ ★ depending on the version
<b>Staff supervision</b>	= no

### Kentaur Full Height Turnstiles

Suitable for both internal & external applications, perimeter fence line, sports stadia, power plants and other areas where cost effective pedestrian access control is required, Kentaur turnstiles are compatible with all access control and building management systems.

## Charon

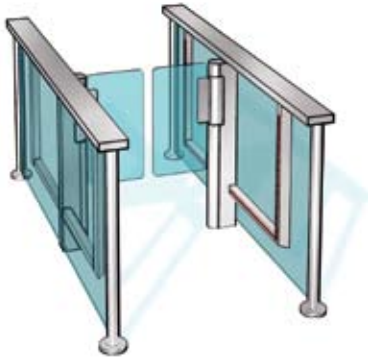

<b>Throughput rate</b>	= approx 20 persons per minute
<b>Security level</b>	= ★ ★
<b>Staff supervision</b>	= yes

### Charon Half Height Sensor Barriers

The complete HSB range was designed for access control of staff and visitors in the reception area of companies and public organisations. The barrier is a sensor monitored channel with automatic waist-high swing doors. An additional version with a wider opening provides access for people with reduced mobility.

# Public Access Solutions - Product Selector

## Argus

**Throughput rate** = over 40 persons per minute  
**Security level** = ★ ★  
**Staff supervision** = yes

### Argus Half Height Sensor Barriers

The requirements for security and aesthetics in companies and public institutions are growing continuously. As such, Argus HSB's are installed to regulate the flow of people in busy reception areas and provide visitors with the first and lasting impression of the building.

## Kerberos

**Throughput rate** = up to 40 persons per minute  
**Security level** = ★  
**Staff supervision** = yes

### Kerberos: Tripod Barriers

Available in six different designs, Kerberos Tripod barriers provide access control at entrances to office and administrative buildings, industrial installations, banks and many other applications. They are quick, reliable and easy to use and are compatible with all types of ID readers.

# Benefits of Kaba Public Access Solutions

- Easy to install and operate
